TABLE OF CONTENTS

Preface 1

On the use of hierarchical models in engineering analysis
K.J. Bathe, N.-S. Lee and M.L. Bucalem 5

A discourse on the stability conditions for mixed finite element formulations
F. Brezzi and K.J. Bathe 27

A posteriori error estimation
R.E. Ewing 59

Parallel computation with adaptive methods for elliptic and hyperbolic systems
M. Benantar, R. Biswas, J.E. Flaherty and M.S. Shephard 73

The three R's of engineering analysis and error estimation and adaptivity
O.C. Zienkiewicz and J.Z. Zhu 95

Factors affecting reliability of computer solutions with hierarchical single surface constitutive models
C.S. Desai, G.W. Wathugala, K.G. Sharma and L. Woo 115

The use of a priori estimates in engineering computations
B.A. Szabó 139

The problem of modeling the elastomechanics in engineering
I. Babuška 155

A posteriori error analysis in finite elements: The element residual method for symmetrizable problems with applications to compressible Euler and Navier–Stokes equations
J.T. Oden, L. Demkowicz, W. Rachowicz and T.A. Westermann 183

A priori estimates for mixed finite element methods for the wave equation
L.C. Cowsar, T.F. Dupont and M.F. Wheeler 205

Accuracy and adaptivity in the numerical analysis of thin-walled structures
L. Plank, E. Stein and D. Bischoff 223

Framework for the reliable generation and control of analysis idealizations
M.S. Shephard, P.L. Baehmann, M.K. Georges and E.V. Korngold 257

Mixed finite element methods for elliptic problems
D.N. Arnold 281

Adaptive finite element methods for diffusion and convection problems
C. Johnson 301

A posteriori error estimates for the Stokes equations: A comparison
R.E. Bank and B.D. Welfert 323

Predictor–corrector procedures for stress and free vibration analyses of multilayered composite plates and shells
A.K. Noor, W.S. Burton and J.M. Peters 341

Adaptive grids for coupled viscous flow and transport
K.C. Wang and G.F. Carey 365
